

Helicopter Pinwheels

To make your Helicopter Pinwheel, you'll need:
Origami Paper, Scissors, Glue, Cork Stopper, Thumb tack (optional)

Step 1
Cut about 2 inches diagonally towards the corners of the paper towards the center (see the photo)

Step 2
Attach each resulting corner to the center of the square with a dot of glue. Let dry. (see the photo)

Step 3
Place glue in the center and attach the cork stopper. Let dry. (If you wish to secure it more, flip the pinwheel and place a thumb tack through the cork.)

Step 5
Now you're ready to play! Hold the helicopter pinwheel up really high with the cork facing down and let go!
